

# Title of the Notebook

---

a one-line subtitle

Your Name

June 29, 2026

dyed in indigo, madder & weld ruled in iron-gall. woven on LOOM.

# 1 FIRST COURSE

One-line orientation for this section.

The **big idea**, in your own words, before the machinery. This is the passive layer: written to be read.

## The paradigm

**Trigger.** When you'd reach for this.

A displayed master fact:

your key equation here

## Cheat-sheet

| tool | setting   | when to use                                                      |
|------|-----------|------------------------------------------------------------------|
| A    | a setting | a wrapping description that flows to the next line if it is long |
| B    | another   | another note                                                     |

## Results (read the statement, fill the proof)

**Definition 1.1** (*a name*). A madder knot. State the object, but leave the key clause blank: closed under \_\_\_\_\_ and \_\_\_\_\_.

**Theorem 1.2** (*attribution*). An indigo knot. State the result in full.

*Proof.* Skeleton: (i) the first move; (ii) the second. [fill in: the step that makes it work]

**Example 1.3.** A weld knot for a worked instance.

**Your turn.** Restage the example as a computation you do. Show that ...

**Remark.** An unboxed aside.

Inline prose continues here. marks how well you grok this block (0–5).

A quick active-recall question. An open thread / exercise to pull next time.
